TRAININGS

Java Script

udemy, Online

Aug 2020 - Sep 2020

JavaScript plays a crucial role in the web development field. So, I have successfully mastered the concepts of JS with the help of this course.

Ethical Hacking

udemy, Online

Feb 2020 - May 2020

I am very anxious to gain knowledge and find the vulnerabilities which can cause harm and to patch them. So, I successfully completed the Ethical Hacking course on Udemy to gain some knowledge to deal with them.

PROJECTS

COVID-19 Tracker

Jul 2020 - Jul 2020

<https://covid19-tracker-f7b4a.web.app/>

This application is used to track COVID-19 local and global coronavirus cases with active, recoveries and death rate on the map, from all over the world.

Amazon-Clone

May 2020 - Jun 2020

<https://clone-c11cf.web.app/>

This is an amazon-clone application with full authentication and functionality, which was built using ReactJs(frontend) and Firebase(backend).

Exploitation of an Android Device

Mar 2020 - Mar 2020

This project is all about finding a vulnerabilities and analysing them. We will explore what information the attacker might get, if he Social Engineer a user/victim to compromise the device and gain a connection with the victims' device.

Flippy

Nov 2017 - Dec 2017

Flippy is a strategy board game, for 2 players, played on an 8x8 board. There are 64 identical game pieces called disks, which are light and dark on opposite sides. Players take turns placing disks on the board with their assigned colour facing up.
